

## 'Building Partnerships' in Insurance Services

Having spent many years successfully carrying out high-profile contracts such as the repairs and maintenance of the Sellafield nuclear site, Stobbarts have built on this competence and have applied it to the domestic market. Working with loss adjusters, Tier 2 suppliers and other insurance industry stakeholders we have developed a dedicated team specially aligned to their requirements.

Our 'Building Partnerships' strategy ties in neatly with the changes in the insurance industry over the past number of years. Where 'Building Partnerships' aims to increase the level of long-term relationships in the construction industry, insurers have for the past number of years been seeking larger, more resilient contractors for long term certainty in order to maintain the high quality of the work carried out.

As one of the UK's Fastest 100 Growing Businesses, as featured in the Sunday Times Virgin Atlantic Fast Track 100. Stobbarts have developed a trusted brand in Cumbria that is recognised for high quality and value. The high quality of our work has only come through the dedication that exists between the company and its employees. Our recognition for the large volume of training and development has been externally recognised through our Investors in People status and winning the North West Chartered Accountants Society's Best Business 2004/2005. This investment and dedication has resulted in high levels of customer satisfaction and repeat business from some of the areas largest organisations.

Stobbarts are also one of the few multidiscipline contractors to have triple accreditation for Quality, Environment and Health & Safety standards, as well as being one of the first construction companies of its size initiating a ground breaking Corporate Responsibility programme.

Our services for loss adjusters and Tier 2 insurance repair providers are fully tailored to the individual requirements of the customer. Having invested heavily in IT over the past five years, we are able to offer full e-commerce systems, including the automated passing of works orders and payment transactions. As part of our dedicated teams for insurance services, we are able to offer each client a dedicated account representative and full access to emergency call-out numbers so that urgent safety related repairs are attended to immediately.

Stobbarts are able to offer the following services and more to our clients:

- Roofing Works
- Carpet Cleaning
